CAREER OBJECTIVE

Motivated and detail-oriented Computer Science Engineering graduate seeking an opportunity to begin a professional journey in the IT industry. I aspire to contribute to innovative projects by applying my academic knowledge, problem-solving abilities, and keen interest in emerging technologies. Committed to continuous learning and dedicated to delivering quality-driven results while growing as a valuable team member in a dynamic work environment.

EDUCATION

B-Tech in Computer Science and Engineering	2021 - 2025
University College of Engineering and Technology MGU, Nalgonda	CGPA: 7.7/10

TECHNICAL SKILLS

- **Programming Languages:** Python, Basics of Java, Basic of C.
- **Web Technologies:** HTML, CSS, JavaScript.
- **Database Technology:** SQL Server, Oracle
- **Tools & IDEs:** VS Code, Eclipse.
- **Version Control:** Git, GitHub.
- **Data Visualization & BI Tools:** Power BI

PROJECT

Indian Currency Classification Using Deep Learning:

- Developed a deep learning model to classify Indian currency notes and assist in detecting fake or damaged bills.
- Implemented and compared CNN, VGG-11, and VGG-16 architectures; CNN achieved the best performance with 95% accuracy and faster inference time.
- Collected and cleaned a dataset of over 3,000 currency note images from Kaggle for training and validation.
- Performed data preprocessing, augmentation, and normalization to improve model generalization.
- Used Python and Jupyter Notebook for development and evaluation.
- Built a complete pipeline covering data collection, preprocessing, model training, testing, and evaluation.
- Proposed future enhancements including real-time detection on mobile devices and integration with blockchain for result integrity and tamper-proof verification.
- **Tools & Technologies:** Python, TensorFlow, Keras, OpenCV, NumPy, Pandas, Matplotlib, Jupyter Notebook, Kaggle Dataset.

SOFT SKILLS

- Project Management Skills.
- Learn new concepts.
- Communication Skills.
- Time Management.
- Problem Solving.
